

KGOTSOFALANG MAGANYA

Intermediate Software Developer | Full-Stack | C# | .NET | SQL | React

Email: Kg.obedience@gmail.com | Phone: +27 67 197 5848 | Location: Johannesburg, Gauteng, South Africa

Portfolio: <https://kgotso-hub.github.io/> | LinkedIn/GitHub: kgotso-hub

PROFESSIONAL SUMMARY

Results-driven Intermediate Software Developer with 6+ years of experience building and modernising full-stack systems for financial-technology and enterprise environments. Proven track record delivering scalable C#/ASP.NET solutions, migrating legacy Windows Forms applications to modern web architectures, and optimising SQL Server performance across high-availability production systems. Skilled across the full SDLC using Agile methodologies, with hands-on experience in REST API integration, automated testing, and cross-functional delivery. Eager to bring this technical depth and a continuous-improvement mind-set to Nedbank's digital banking and software engineering initiatives.

CORE TECHNICAL SKILLS

Programming Languages: C# | SQL | JavaScript (ES6+) | TypeScript | HTML5 | CSS3 | VB.NET

Frameworks & Libraries: ASP.NET | React | Bootstrap | REST Web APIs | Windows Forms

Databases & Reporting: Microsoft SQL Server | T-SQL | Query Optimisation | Crystal Reports

Testing & QA: Selenium WebDriver | Test Project | Postman | Unit Testing

DevOps & Tools: Git | Bitbucket | Visual Studio | VS Code | IIS | JIRA | HubSpot CRM

Methodologies: Agile / Scrum | SDLC | Code Review | Debugging | System Modernisation

WORK EXPERIENCE

Intermediate Programmer

Easy Clear (Pty) Ltd — Johannesburg

Aug 2023 – Present

- Designed and delivered new production features across a multi-module enterprise clearing and invoicing platform, including automated document generation and email workflows that reduced manual processing for end users.
- Built audit and activity-tracking views to improve traceability and troubleshooting across core business workflows, using C# and ASP.NET.
- Implemented filtered search and Excel export functionality, streamlining data extraction and reporting for business users.
- Led migration of Windows Forms modules to a modern ASP.NET web application architecture, improving system accessibility and long-term maintainability.
- Refactored legacy code and optimised T-SQL queries, improving database performance and reducing technical debt across production systems.

Programmer

Singular Systems — Johannesburg

Oct 2022 – Jul 2023

- Owned end-to-end feature development across the SDLC for internal enterprise systems, from requirements through deployment.
- Developed and delivered new features for internal enterprise systems using C# and SQL Server.
- Served as primary developer for an international client project (KYA), managing project progress via HubSpot CRM.
- Participated actively in project planning sessions, estimating effort and aligning delivery timelines with stakeholders.

Junior Programmer

Singular Systems — Johannesburg

Mar 2022 – Oct 2022

- Led day-to-day maintenance of internal production systems, resolving defects and improving system stability.
- Mentored and trained interns, fostering knowledge-sharing and team capability growth.
- Improved code efficiency through refactoring, reducing technical debt and enhancing application performance.
- Gained exposure to React and TypeScript for front-end development tasks.
- Authored automated test scripts using Selenium WebDriver to support regression testing cycles.

Trainee Programmer

Singular Systems — Johannesburg

Mar 2021 – Mar 2022

- Maintained the Share Trust System, a critical financial platform used by major South African organisations.
- Contributed feature development and SQL query optimisation to the KUE project, improving data retrieval performance.
- Created installation packages for Windows desktop applications, streamlining client deployment processes.

Intern — Systems Developer

Singular Systems — Johannesburg

Mar 2020 – Mar 2021

- Designed and built a full-stack internal Tuck-Shop web application featuring online ordering, digital wallet, and payment functionality using C#, SQL, HTML, CSS, and JavaScript.
- Introduced to automated testing frameworks including Selenium WebDriver and Test Project.
- Gained exposure to live client deliverables during the later stages of the internship programme.

EDUCATION

National Diploma: Information Technology – Software Development

Nelson Mandela University

Feb 2017 – Dec 2019

Port Elizabeth (Gqeberha), South Africa · National Qualification Framework (NQF) Level 6

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Continuous learning through hands-on project delivery, code reviews, and Agile team participation.
